Investment & Performance Analytics | Portfolio Reporting | Credit &
Collateral Analysis | Excel, SQL, Bloomberg, Refinitiv
Greater Bengaluru Area

Summary

I'm a finance and analytics professional with experience across investment performance, portfolio and fund reporting, financial data support, and collateral analysis. In my current role, I review client collateral files, validate data and file formats, investigate reporting exceptions, and prepare collateral schedules to support credit-risk processes. Previously, at State Street, I performed benchmark reconciliation and return checks, supported portfolio and fund audits, completed yield reporting, and reconciled client billing. I also contributed to automation within the billing process as part of performance reporting. At Refinitiv, I supported financial data products and helped institutional clients resolve data, account, and application questions. I hold a Master's in International Business, Trade, and Commerce and a BBM in Accounting and Finance. I use Excel, SQL, Bloomberg, and Refinitiv products. I've completed SQL analysis of Swiggy sales data and built a dashboard on unemployment in India during COVID-19. I'm currently pursuing Power BI and generative AI. I'm interested in Investment Performance, Investment Analytics, Performance Reporting, Financial Analytics, and Credit or Collateral Analyst roles.

Experience

Wells Fargo

Analytics associate

September 2024 - Present (2 years 2 months)

Bengaluru, Karnataka, India

Using technical tools to track, analyze, and report on assets pledged as security (collateral) to mitigate credit risk. Identify the key fields and their source and check the source files to see if the information is logical and being picked up correctly by the processing tool.

Review and prepare collateral reporting files received from the clients for processing & inventory various reports.

Perform additional file format due diligence by reviewing various file types & troubleshooting various file formats.

Perform trend analysis and exception report review, root cause analysis to identify the probable causes for variation in total gross collateral on the Ineligibles Schedule.

Seek second level review as needed.

Create final ineligibles schedule against the client's collateral reporting files.

Tools-ACL, Excel

State Street

Senior Analyst – Investment and Performance Reporting Analysis

June 2022 - August 2024 (2 years 3 months)

Bengaluru

Performed benchmark reconciliation and daily, weekly, and monthly audits for investment portfolios and funds. Reviewed security-level, cash and derivatives returns, account returns, and control reports across monthly, quarterly, YTD, 3–5-year, and since-inception periods. Coordinated with upstream and downstream teams to resolve issues and consolidated data for status updates. Supported client billing reconciliations and contributed to billing process automation within the performance reporting role, including converting Excel macro bills to BPA. Tools: Bloomberg, Excel.

Refinitiv, an LSEG business

Client Support Analyst

June 2021 - June 2022 (1 year 1 month)

Bangalore Urban, Karnataka, India
